

Hot Town, Summer in the City

Lisa and I are grateful for the privilege of serving in the city. It is a blessing to see people trust Christ for salvation. We are thrilled to see lives transformed by God's grace. And we rejoice to see small spiritual families growing in urban neighborhoods. We're thankful for co-workers like Pete & Danielle Forshtay and Mike & Margarete Connor.

Of course there are challenges. Human sinfulness is highly concentrated in densely populated cities. Poverty, crime, drugs, oppression and brokenness can be overwhelming. But, we serve a great God who empowers our service!

The Lord has provided a great team of prayerful supporters. He's developing our leadership team. Jesus is building His church in Philadelphia. And, He's given us facilities to use in our ministry to the inner city.

We're thankful for the building the Lord has provided in Bridesburg. It enables us to reach out to a needy community as we work to develop a church in that neighborhood.

Recently, we learned that we need to replace the rooftop HVAC unit. We've been dealing with the lack of air conditioning through the summer, but it is an obstacle to ministry. And, it must be replaced before the heating season begins.

Please pray with us for God's provision.
We need \$7,500 to have a new HVAC unit installed. Could the Lord use you to help?
Please mark your check "HVAC" and use the enclosed envelope.

Thanks for sharing in our ministry,
